SCHOLARSHIPS NOW AVAILABLE

ACEC is pleased to announce a new scholarship opportunity available to members, as well as the opening of the Hauschild Scholarship Application period. **Applications for both scholarships are due February 28, 2026.**

Dairyland Power Cooperative Careers Scholarship

The Dairyland Power Cooperative Careers Scholarship was established to support one post-secondary education student annually. Preference is given to students who are pursuing studies for careers found in electric utility settings (engineering, IT, communications, economics, human resources, public relations, finance/accounting, etc.). Students' parents or legal guardians must be ACEC members.

Hauschild Memorial Scholarship

Graduating high school seniors entering a course of study in the electric field (electricians, line workers, electrical engineers, etc.) are encouraged to apply for an ACEC Hauschild Memorial Scholarship. Students' parents or guardians are not required to be ACEC members but must reside within the boundaries of our service area.

TIPS TO AVOID ENERGY SCAMS

Beware of "winter bill relief" energy scams. Scammers often exploit high winter bills by offering fake discount or relief programs. They may ask for upfront payments or personal details to lower your rate. Legitimate utilities never demand gift cards, wire transfers or payment through apps like PayPal or Venmo. Always verify offers directly by calling your utility's phone number located on your energy bill—do not call any phone numbers provided in a suspicious email or text. Remember to take time to confirm before you pay; real savings programs won't pressure you for immediate action.

ENERGY EFFICIENCY TIP OF THE MONTH

Winter weather can cause your home heating system to work overtime. Check for air leaks and drafts around doors and windows, then seal them with weatherstripping or caulk. Close fireplace dampers when not in use, and consider installing insulating curtains to help keep warm air inside. You can also save energy by lowering your thermostat a few degrees. Even small adjustments like these can reduce heating costs and improve comfort during the coldest months.
